

Kevin Diletzoy

UI Designer

Page 1 of 2

Profile

UI designer with background in engineering design and drafting with experience in producing drawings and visual designs that efficiently communicates a specific functionality to the user. Skilled in applying design fundamentals to provide a clean and intuitive experience.

UX/UI Design Projects

CareerFoundry Case Studies, 2021 - 2022

Apptitude, Skill Connection App

Designed for users to take tests, and results will reveal skillsets that they may have an aptitude for. Also helps connect users who have similarities in skill sets.

- Applied research and tailored personas for developing solutions, and introducing users to new potential skillsets.
- Operating Adobe XD to effectively design across Android and iOS platforms for varied user adaptability.
- Conduct user interviews, using effective verbal tools to extract required information.
- Develop multiple wireframe iterations based off user feedback.
- Tailored specific app features to customize user experience based off user testing.

Geoware Market, Pottery Ecommerce App

Design focused around the selling and purchasing of pottery based goods. Targeted users are provided specified for their pottery needs.

- Provided common pain points from ecommerce apps and designed experience around solutions to those points.
